Byxbee Park in Palo Alto

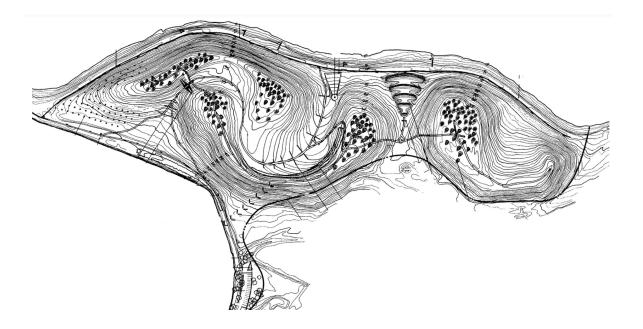

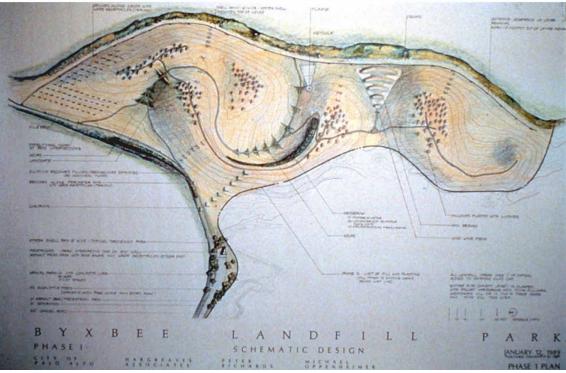

Byxbee Park Master Plan

Hargreaves Associates created a master plan for this 150-acre public waterfront park located or a sanitary landfill on the San Francisco Bay and designed the 30-acre, phase-one plan.

About mounds

I focus on mounds, not because of these particular plants, but because mounds and ridges, integral parts of sculpting our oasis/park/ garden can shield units from view—providing enhanced privacy while allowing residents to look out, and provide several social spaces with a sense of privacy, surrounded by beauty.

Also, mounds with plants have excellent acoustic properties, muffling noise, enabling clear conversation.
